

City of Lexington

## STATEMENT OF SUPPORT

It is the purpose and intent of our public education/awareness program to comply with the requirements stated in the US Office of Pipeline Safety RP 1162. This program will educate the stakeholder groups, including the general public, on or near the natural gas pipeline system of the steps to prevent, respond, recognize and report a natural gas pipeline incident.

Recognizing the importance of achieving effective public/community awareness, officials of the City of Lexington and management of the Lexington Gas System hereby state their support and commitment to the Public Awareness Program by participation in the program and by providing adequate resources that are essential for its success.
